50X1-HUM

1. At Pillau (225) the outer harbor, inner harbor and entrance channels can all be used. The docks suffered only minor damage during hostilities and are now repaired.
2. The power and water supply for the pier has not yet been restored. The "Westinghouse Power Train", which is in use continuously, has been installed as a make-shift in the inner harbor between the destroyed Sea Railroad Station and the destroyed Naval Equipment Railroad Station.
3. The large lighthouse is in use, although with changed recognition signals and a smaller radius of action. The former German Signal Station is occupied, and another Signal Station has been set up in the tower of the harbor light.
4. Coaling and watering facilities for ships are primitive.
5. Defenses for the harbor consist of four or six four-inch guns which cover the main entrance channel from the north.
6. There is daily paddle-steamer service to Kaliningrad (Königsberg) via the Sea Canal.
